GLOBAL OCCUPATIONAL HEALTH SERVICES

Our decades of solid knowledge and experience worldwide allow us to provide Global Occupational Health services such as:

· fit-to-work medical check-ups
· OEUK certification
· Health surveillance programmes
· Travel vaccination programmes
· Sickness and OH assessments

The services are performed through our own country medical centres or our wide network of trusted third-party providers.

Global Provider Network

We operate globally by carefully selecting third-party providers in countries across the world, who are able to carry out medical assessments according to the international standards that we require.

With our pool of trusted providers worldwide, we are able to take care of the health, safety, and wellbeing of your employees around the world, especially if they work in harsh climatic environments such as offshore installations, remote locations, hostile regions, and rough geophysical terrain.

Global Knowledge with Standardised Approach

We develop programmes, policies, and procedures that are tailored to the specific requirements of our clients' operations whilst strictly adhering to the highest international standards and country-specific Occupational Health protocols of different countries worldwide, with which we are extremely acquainted and experienced.

We are dedicated to delivering a globally consistent Occupational Health programme, which is managed by a dedicated team of professionals from our head office in Malta. We ensure a standardised approach to health requirements and assessments that safeguard our quality standards, whilst adhering to the country-specific regulations. This gives our clients the peace of mind that their employees' health are compliant with all relevant requirements wherever they are assigned to work.

GLOBAL OCCUPATIONAL HEALTH SERVICES

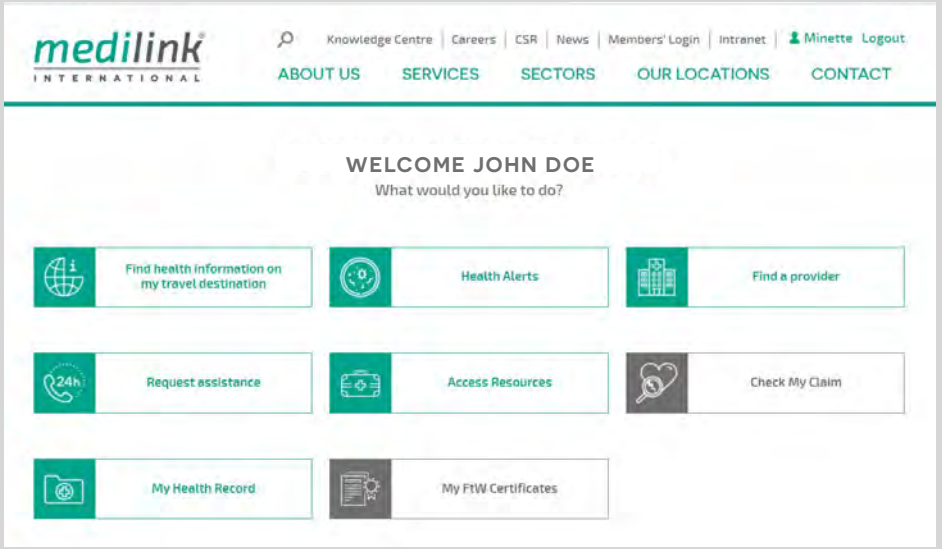
Case Management & Monitoring

We manage the end-to-end medical requirements of the employees, providing convenience and a smooth experience to both the employer and their employees. Our expert team of trained Case Managers in Occupational Health act as the single point of contact, who will assess, plan, implement, and evaluate a care programme for each employee.

We ensure that your employees are physically and mentally capable and prepared to perform their specific job role in order to reduce risks and injuries in the workplace. This includes developing the requirements for each role, and reviewing the results, as well as providing the certification to the employees in accordance to the international standard criteria.

We provide a high level of care to employees in cases of sickness where we arrange the treatment, monitor the progress, and report to the employer. This is to ensure that all employees receive the optimum care and support they need and that effective decisions are taken in a timely and accurate manner.

All medical results are conveniently accessible to the employees through a dedicated Medilink online portal. Our team is also supported by medical professionals who are available to explain the results to the employees whenever they have further clarifications.
We devote care and attention to each case we manage, fostering an environment that promotes healthy physical and psychological wellbeing for all employees.



GLOBAL OCCUPATIONAL HEALTH SERVICES

Our range of Global Occupational Health services also include the following:

- Pre-Employment Medicals (Fit-to-Work Medical Certificate)
- Exit Medicals
- Periodical Check-up
- Pre-Deployment (or Pre-travel occupational medicals)
- Sickness Assessment
- Occupational Health Assessment
- Return to Work Assessment
- OEUK Medical Certificate
- Travel Vaccination Programmes
- Health Surveillance Programmes
